

Excitation Control Systems

Basler Electric – Your Complete Excitation Solution

The addition of the Cutler-Hammer Excitation Control product line, specifically the ECS-2100, expands the scope of the Basler Electric product offering. The combined technology and experience created by the merging of these two synergistic product lines places Basler in a premier position to provide customers with an Excitation System solution for any new generator installations or retrofit applications.

DECS-100

- Over/Under Excitation Limiters
- VAR/Power Factor Control
